ABSTRACT

This directory lists all postsecondary institutions in the United States and its outlying areas known to exist as of April 15, 1990. Data were obtained from the Integrated Postsecondary Education Data System "Institutional Characteristics" survey for 1989-90. Introductory tables in both volumes provide summary information and in both volumes institutions are listed in the main body alphabetically by state. The information presented for each institution includes its name, address, telephone number, 1988 fall enrollment, tuition and fees, and room and board charges for the 1989-90 academic year. Also included are type of control, highest offering (degree or length of time), types of programs offered, and recognized accreditations. Both volumes contain two appendixes listing changes in institutions of higher education (institutions added, deleted, no longer accredited, with name changes, etc.) for 1988-89 and 1989-90. Also appended in both volumes is a list of accrediting bodies recognized by the Secretary of the U.S. Department of Education. (DB)

Foreword

The 1989-90 edition of the *Directory of Postsecondary Institutions* lists all postsecondary institutions in the United States and its outlying areas that were known to exist as of April 15, 1990. Because of the large number of institutions and their diversity, this Directory is published in two volumes. Volume I includes the 4-year-and-above institutions and the 2-year institutions; Volume II includes the less-than-2-year institutions.

The information presented for each institution includes its name, address (including ZIP code), telephone number, 1988 fall enrollment, tuition and fees, and room and board charges for the 1989-90 academic year. Also included are control, highest level of offering, types of programs offered, and recognized accreditations.

This edition of the Directory presents data from the Integrated Postsecondary Education Data System (IPEDS) "Institutional Characteristics" survey for 1989-90. A full explanation of the data can be found in the introduction to the Directory.

We would like to express our appreciation to the officials of the postsecondary institutions who responded to our request for data and to the coordination officials of the State education agencies who assisted in the data collection and the resolution of inconsistencies.

Introduction

The 1989-90 *Directory of Postsecondary Institutions* was developed by the National Center for Education Statistics (NCES) using information from the Integrated Postsecondary Education Data System (IPEDS). IPEDS encompasses all institutional providers of postsecondary education and gives a comprehensive description of the Nation's postsecondary education enterprise.

This directory includes the 10,776 postsecondary education institutions in the 50 States, the District of Columbia, and the outlying areas that were included in the IPEDS universe as of April 1990. There were 2,603 colleges granting a bachelor's or higher degree; 2,818 2-but-less-than-4-year schools; and 5,355 less-than-2-year institutions. This "universe" is constantly changing, especially among the less-than-2-year schools, because of the special nature of these institutions.

The information for each institution, presented by State, includes the name of the school, location (street or mailing address, city, and ZIP code), telephone number, the unit identification (UNITID) code, the Federal Interagency Committee on Education (FICE) code (if applicable), control, highest level of award offered, 1988 fall enrollment, and institutional accreditation. Also provided are tuition and fees required for full-time students and room and board charges, where applicable.

An (H) preceding the name indicates that the institution is accredited at the college level by an agency listed as nationally recognized by the Secretary, U.S. Department of Education; a list of these accrediting bodies is included as Appendix C. These institutions were formerly part of the Higher Education General Information Survey (HEGIS) universe and, as such, must be legally authorized to offer at least a 1-year program of study creditable toward a degree. No attempt was made to verify accreditation status for this directory; verification will be conducted in the fall of 1990. The Division of Eligibility and Certification, in the Office of Postsecondary Education, determines which postsecondary schools are eligible to be classified as institutions of higher education. (As of April 15, 1990, there were 3,598 higher education institutions and their branches listed as having recognized accreditation.) Additions, deletions, and other changes in the universe of institutions of higher education since the last *Directory* are found in appendixes A and B.

An asterisk (*) in an entry indicates that data were not reported.

Because of the large number of institutions and the diversity of their educational programs, this directory is published in two volumes. Volume I includes the 4-year and 2-year institutions, and Volume II the less-than-2-year institutions. A comprehensive set of tables and appendixes is included in each volume for the convenience of the user. Each volume also includes its own index, which lists included institutions in alphabetic order.

Terms Used in the Directory

Postsecondary Institution

Included in the *Directory* are universities, colleges at the 4-year and 2-year levels, professional schools, community colleges, technical institutes, business schools, and occupationally-oriented vocational schools. Postsecondary education is defined as the provision of formal instructional programs with curricula designed primarily for students who have completed the requirements for a high school diploma or its equivalent. This includes programs that are academic and lead toward a degree or other formal award; occupational or vocational programs that train the completers in specific job skills or qualify them for specific jobs; and continuing professional education where additional skills are acquired in a specific field of study. Postsecondary education is not intended to include basic adult education or avocational programs such as those taken for personal interest or leisure.

Postsecondary education is conducted by a variety of providers; however, IPEDS is limited to those institutions and their branches with a *primary* purpose of providing postsecondary education. IPEDS includes data about the following providers:

1. **Four-year-and-above institutions.** Institutions or subsidiaries with a primary purpose of providing postsecondary education, that award at least a 4-year degree or higher in one or more programs.

2. **Two-year institutions.** Institutions or subsidiaries that have a primary purpose of providing postsecondary education and that confer at least a 2-year formal award (certificate, diploma, or associate's degree), or have a 2-year program that is creditable toward a baccalaureate, but do not award a baccalaureate or higher degree.

3. **Less-than-2-year institutions.** Institutions or subsidiaries that have a primary purpose of providing postsecondary education and that have programs, lasting less than 2 years, that result in a terminal occupational award, or are creditable toward a formal 2-year-or-higher award.

Higher Education Institution

For the purpose of this directory, an institution of higher education is one that is accredited at the college level by an agency or association recognized by the Secretary, U.S. Department of Education. These schools were formerly part of the HEGIS universe and are identified in the *Directory* with an (H) preceding the name of the school.

Branches

Sites other than the main campus are considered branches and are listed separately if they meet *each* of the following criteria:

1. The campus or site is not temporary;

2. The site is in a community considered to be beyond a reasonable commuting distance from the parent institution; and

3. An organized program of study is offered at the site, not just unrelated courses.

Control

This directory lists institutional control, as reported by the institution, according to the following categories:

- Public—An educational institution whose programs and activities are operated by publicly elected or appointed school officials and which is supported primarily by public funds.

- Private—An educational institution controlled by a private individual(s) or by a nongovernmental agency, usually supported primarily by other than public funds, and operated by other than publicly elected or appointed officials.

- Private Nonprofit—A private institution in which the individual(s) or agency in control receives no compensation, as distinguished from wages or rent, for the assumption of risk. These include both independent nonprofit schools and those affiliated with a religious organization.

- Private For-Profit (profitmaking)—A private institution in which the individual(s) or agency in control receives compensation other than wages or rent for the assumption of risk.

Level of Offering

Highest level of offering includes the following categories:

- Postsecondary Award, Certificate, or Diploma (less than 1 academic year). An award that normally requires completion of an organized program of study at the postsecondary level in less than 1 full-time-equivalent academic year (2 semesters or 3 quarters), or in less than 900 contact hours by a student enrolled full time.

- Postsecondary Award, Certificate, or Diploma (at least 1 but less than 2 academic years). An award that normally requires completion of an organized program of study at the postsecondary level in at least 1 but less than 2 full-time-equivalent academic years, or is designed for completion in at least 30 but less than 60 credit hours, or in at least 900 but less than 1,800 contact hours.

- Associate's Degree. An award that normally requires at least 2 but less than 4 years of full-time-equivalent college-level work.
- Postsecondary Award, Certificate, or Diploma (at least 2 but less than 4 academic years). An award (other than an associate's degree) that normally requires completion of an organized program of study at the postsecondary level in at least 2 but less than 4 full-time-equivalent academic years, or is designed for completion in at least 60 but less than 120 credit hours, or in at least 1,800 but less than 3,600 contact hours.
- Bachelor's Degree. An award that normally requires at least 4 but not more than 5 years of full-time-equivalent college-level work. This includes all bachelor's degrees conferred in a 5-year cooperative or work-study plan or program. A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with college studies. Also included are bachelor's degrees for which the normal 4 years of work are completed in 3 years.
- Postbaccalaureate Certificate. An award that requires completion of an organized program of study of 18 credit hours beyond the bachelor's degree, designed for persons who have completed a baccalaureate degree but do not meet the requirements for an academic master's degree.
- Master's Degree. An award that requires the successful completion of a program of study of at least 1 but not more than 2 full-time equivalent academic years of college work beyond the bachelor's degree.
- Post-Master's Certificate. An award that requires completion of an organized program of study of 24 credit hours beyond the master's degree, but does not meet the requirements of academic degrees at the doctor's degree level.
- Doctor's Degree. An award that requires work at the graduate level and terminates in a doctor's degree. Includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Doctor of Philosophy degree in any field such as agronomy, economics, chemistry, or engineering.
- First-Professional Degree. An award that requires completion of a program that meets all of the following criteria: (1) requires at least 2 years of college work before entering the program; (2) requires completion of the academic requirements to begin practice in the profession; and (3) requires a total of at least 6 academic years of college-level work to complete the degree.

  First-professional degrees may be awarded in the following fields:

  Chiropractic (D.C. or D.C.M.)
  Dentistry (D.D.S. or D.M.D.)
  Law (L.L.B., J.D.)
  Medicine (M.D.)
  Optometry (O.D.)
  Osteopathic Medicine (D.O.)
  Pharmacy (D.Phar.)
  Podiatry (Pod.D. or D.P.)
  Theology (M.Div. or M.H.L. or B.D.)
  Veterinary Medicine (D.V.M.)

- First-Professional Certificate (post-degree). An award that requires completion of an organized program of study designed for persons who have obtained the first-professional degree. Examples could be refresher courses, or additional units of study in a specialty or subspecialty.

Identification Codes

The *Directory* includes two identification codes used throughout the text:

- UNITID. This unique 6-digit identification code is assigned by the National Center for Education Statistics to each unit, or postsecondary institution, included in IPEDS; it will not change from year-to-year. The UNITID is used to link all IPEDS databases including

Institutional Characteristics, Fall Enrollment, Completions, Finance, Salaries, etc.

- FICE. This identifier was created by the Federal Interagency Committee on Education. The 6-digit code is included in the *Directory* to identify those institutions accredited at the college level by an agency recognized by the Secretary, U.S. Department of Education. Institutions carrying a FICE code were formerly included in the Higher Education General Information Survey (HEGIS) system, or are newly accredited institutions of higher education. IPEDS uses FICE to maintain the identification of this subset of accredited schools; however, since IPEDS separately identifies all institutions and branches that offer complete programs of study, a school may have several entries now, where only one existed under HEGIS. In order to identify the branches of HEGIS schools that are now separate reporting units, NCES has developed a "dummy" FICE code. For example, assume that "ABC College" (FICE code = 005555) was considered one school with all campuses reporting together in HEGIS. The IPEDS system, however, considers it to be three separate schools, each with its own UNITID code:

UNITID	Institution Name	FICE
123444	ABC College - Main Campus	005555
123555	ABC College - West Campus	905555
123666	ABC College - Another City	905555

The assignment of these "dummy" FICE codes (i.e., with a "9" in the first position) allows readers and analysts to identify all parts of the universe of accredited institutions.

In addition to displaying the FICE code in the institutional listings, these schools have an (H) preceding the school name for easy identification.

Enrollment

The fall 1988 total enrollment is given for each institution. Undergraduate, graduate, and first-professional students, both full- and part-time, are included. Also included are students taking courses that are part of a vocational or occupational program. Excluded are students in noncredit adult education courses; students taking courses at home by correspondence, radio, or television where the courses are not creditable toward a degree or other formal award; students enrolled only for "short courses;" auditors; students studying abroad; and students enrolled at a branch campus or extension center in a foreign country.

For institutions included in the 1988 IPEDS "Fall Enrollment" survey database, actual responses (R) or imputed data (I) are provided. The total student headcount is followed by the percent of students who are female. Since the private less-than-2-year schools were surveyed for fall enrollment on a sample basis, these schools list the enrollment count provided on the 1989-90 "Institutional Characteristics" survey form.

Tuition

Institutions were asked to report the typical tuition and fees required of full-time students for the entire 1989-90 academic year. Required fees are defined as charges to students for items not covered by tuition, but required of such a large proportion of all students that the student who does not pay the charge is an exception.

- For each institutional listing, tuition at public 4- and 2-year schools is indicated as "in-State" or "in-district" when there is a difference in charges based on residency requirements. For private schools, all tuitions are "in-State."
- Separate charges are shown for graduate programs, where applicable.
- In private less-than-2-year schools, the tuition and required fees are given for the program with the largest enrollment at that school.

Room and Board Charges

Institutions were asked to report room and board charges for the entire academic year. Room charges were to reflect what a student would expect to pay if sharing a room with one other student. Institutional listings indicate the yearly charge for a meal plan and, in parentheses, the number of meals provided per week.

In some instances, institutions charge one fee for both room and board. For these schools, the combined amount is listed under the room charge; the board charge is shown as "$$," followed by the number of meals provided.

Accreditation

Accreditation, as indicated in this directory, is self-reported by the institutions; no attempt has been made to verify these with the various regional or professional accrediting bodies. This verification process will be conducted during the fall of 1990. The professional accrediting agencies shown in the institutional listings are those recognized by the Secretary, U.S. Department of Education. A complete list of these associations and their accreditation acronyms (as used in the institutional listings) can be found in appendix C.

Survey Methodology

The "Institutional Characteristics" (IC) survey was mailed to 11,687 institutions in July 1989. IC1 forms were sent to 140 corporate or system offices that administered two or more postsecondary institutions, plus 2,649 institutions that offered a 4-year award or higher; 3,190 received an IC2 form (public schools offering awards for programs of less-than-4-years duration, and private schools with programs of at least 2-but-less-than-4-years duration); and IC3 forms were mailed to 5,708 private schools offering awards for programs of less-than- 2-years duration. Also, between August 1989 and January 1990, approximately 300 IC forms were mailed to schools and/or branches that were identified as possible additions to the IPEDS universe. However, new schools were added to the universe only if a completed "Institutional Characteristics" survey form was received and it was determined that the school offered postsecondary education programs.

The IC survey forms were designed to shuttle back to the institutions data that were provided in a prior year; thus, an institution need only update the questionnaires with current or changed information such as tuition and fees.

Survey responses were edited for internal consistency. For example, if graduate programs were offered, was graduate tuition reported? Also, responses were checked for consistency with the previous year's response.

Extensive followup for nonresponse was conducted between October 1, 1989 and February 20, 1990. Institutions were called and key data elements were collected using a CATI (Computer Assisted Telephone Interview) system. Data were then uploaded to the database and were processed and edited.

During the processing cycle, IPEDS coordinators in the States and NCES staff made a considerable effort to "clean up" the universe. Many entities were identified as "out-of-scope" including: schools that were duplicated on the file; those that had closed or no longer offered postsecondary programs; listings that did not conform to the IPEDS definition of a branch, but were really extension centers that are *not* to report separately; and schools that were primarily secondary or avocational, and thus, should not report under IPEDS. The final listing also reflects mergers of existing institutions and new schools that have been added to the universe.

This final universe consisted of 10,919 entities: 143 central/system offices; 2,603 4-year and above institutions; 2,818 2-year schools; and 5,355 schools with less than 2-year programs. A total of 963 schools were deleted, while 195 new schools completed IC forms and were added to the universe. Note that, for the most part, the tables included in the *Directory* are limited to the 10,606 institutions in the 50 States and the District of Columbia.

[1] Based on level of institution at closeout of the 1989-90 survey.

[2] Net added identifies the total number of schools added to IPEDS during the 1989-90 processing year; however, the table does not account for shifting of schools between levels of offering. These shifts are hidden in the first column of the table.

Pub=Public N-P=Nonprofit F-P=For-Profit

The overall response rate to the "Institutional Characteristics" survey (82 percent) was calculated as the ratio of the number of completed questionnaires divided by the number of schools in the final universe; that is, the number mailed minus the number deleted (out-of-scope) plus the new schools that submitted IC forms.

There has been no attempt to impute data requested on the "Institutional Characteristics" survey form; however, tuition charges provided for a quarter or semester were converted to academic year charges to conform to completion instructions.

Symbols Used in the Directory

* Indicates that data were not reported by the institution.

(H) Indicates that the institution is accredited at the college level by an agency recognized by the Secretary, U.S. Department of Education. (See list of approved agencies in Appendix C.)

$$ This symbol indicates that the room and board charges are combined. The total amount is listed under room; $$ is shown under board, followed by the number of meals provided per week.

(R) With enrollment, indicates that the headcount provided is the actual amount reported by the institution.

(I) With enrollment, indicates that the institution did not respond to the 1988 "Fall Enrollment" survey; thus 1988 enrollment data have been imputed.

(F) With enrollment, indicates the percent of the student body that is female.

Foreword

The 1989-90 edition of the *Directory of Postsecondary Institutions* lists all postsecondary institutions in the United States and its outlying areas that were known to exist as of April 15, 1990. Because of the large number of institutions and their diversity, this Directory is published in two volumes. Volume I includes the 4-year-and-above institutions and the 2-year institutions; Volume II includes the less-than-2-year institutions.

The information presented for each institution includes its name, address (including ZIP code), telephone number, 1988 fall enrollment, tuition and fees, and room and board charges for the 1989-90 academic year. Also included are control, highest level of offering, types of programs offered, and recognized accreditations.

This edition of the Directory presents data from the Integrated Postsecondary Education Data System (IPEDS) "Institutional Characteristics" survey for 1989-90. A full explanation of the data can be found in the introduction to the Directory.

We would like to express our appreciation to the officials of the postsecondary institutions who responded to our request for data and to the coordination officials of the State education agencies who assisted in the data collection and the resolution of inconsistencies.

Introduction

The 1989-90 *Directory of Postsecondary Institutions* was developed by the National Center for Education Statistics (NCES) using information from the Integrated Postsecondary Education Data System (IPEDS). IPEDS encompasses all institutional providers of postsecondary education and gives a comprehensive description of the Nation's postsecondary education enterprise.

This directory includes the 10,776 postsecondary education institutions in the 50 States, the District of Columbia, and the outlying areas that were included in the IPEDS universe as of April 1990. There were 2,603 colleges granting a bachelor's or higher degree; 2,818 2-but-less-than-4-year schools; and 5,355 less-than-2-year institutions. This "universe" is constantly changing, especially among the less-than-2-year schools, because of the special nature of these institutions.

The information for each institution, presented by State, includes the name of the school, location (street or mailing address, city, and ZIP code), telephone number, the unit identification (UNITID) code, the Federal Interagency Committee on Education (FICE) code (if applicable), control, highest level of award offered, 1988 fall enrollment, and institutional accreditation. Also provided are tuition and fees required for full-time students and room and board charges, where applicable.

An (H) preceding the name indicates that the institution is accredited at the college level by an agency listed as nationally recognized by the Secretary, U.S. Department of Education; a list of these accrediting bodies is included as Appendix C. These institutions were formerly part of the Higher Education General Information Survey (HEGIS) universe and, as such, must be legally authorized to offer at least a 1-year program of study creditable toward a degree. No attempt was made to verify accreditation status for this directory; verification will be conducted in the fall of 1990. The Division of Eligibility and Certification, in the Office of Postsecondary Education, determines which postsecondary schools are eligible to be classified as institutions of higher education. (As of April 15, 1990, there were 3,598 higher education institutions and their branches listed as having recognized accreditation.) Additions, deletions, and other changes in the universe of institutions of higher education since the last *Directory* are found in appendixes A and B.

An asterisk (*) in an entry indicates that data were not reported.

Because of the large number of institutions and the diversity of their educational programs, this directory is published in two volumes. Volume I includes the 4-year and 2-year institutions, and Volume II the less-than-2-year institutions. A comprehensive set of tables and appendixes is included in each volume for the convenience of the user. Each volume also includes its own index, which lists included institutions in alphabetic order.

Terms Used in the Directory

Postsecondary Institution

Included in the *Directory* are universities, colleges at the 4-year and 2-year levels, professional schools, community colleges, technical institutes, business schools, and occupationally–oriented vocational schools. Postsecondary education is defined as the provision of formal instructional programs with curricula designed primarily for students who have completed the requirements for a high school diploma or its equivalent. This includes programs that are academic and lead toward a degree or other formal award; occupational or vocational programs that train the completers in specific job skills or qualify them for specific jobs; and continuing professional education where additional skills are acquired in a specific field of study. Postsecondary education is not intended to include basic adult education or avocational programs such as those taken for personal interest or leisure.

Postsecondary education is conducted by a variety of providers; however, IPEDS is limited to those institutions and their branches with a *primary* purpose of providing postsecondary education. IPEDS includes data about the following providers:

1. **Four-year-and-above institutions.** Institutions or subsidiaries with a primary purpose of providing postsecondary education, that award at least a 4-year degree or higher in one or more programs.

2. **Two-year institutions.** Institutions or subsidiaries that have a primary purpose of providing postsecondary education and that confer at least a 2-year formal award (certificate, diploma, or associate's degree), or have a 2-year program that is creditable toward a baccalaureate, but do not award a baccalaureate or higher degree.

3. **Less-than-2-year institutions.** Institutions or subsidiaries that have a primary purpose of providing postsecondary education and that have programs, lasting less than 2 years, that result in a terminal occupational award, or are creditable toward a formal 2-year-or-higher award.

Higher Education Institution

For the purpose of this directory, an institution of higher education is one that is accredited at the college level by an agency or association recognized by the Secretary, U.S. Department of Education. These schools were formerly part of the HEGIS universe and are identified in the *Directory* with an (H) preceding the name of the school.

Branches

Sites other than the main campus are considered branches and are listed separately if they meet *each* of the following criteria:

1. The campus or site is not temporary;

2. The site is in a community considered to be beyond a reasonable commuting distance from the parent institution; and

3. An organized program of study is offered at the site, not just unrelated courses.

Control

This directory lists institutional control, as reported by the institution, according to the following categories:

- Public—An educational institution whose programs and activities are operated by publicly elected or appointed school officials and which is supported primarily by public funds.

- Private—An educational institution controlled by a private individual(s) or by a nongovernmental agency, usually supported primarily by other than public funds, and operated by other than publicly elected or appointed officials.

- Private Nonprofit—A private institution in which the individual(s) or agency in control receives no compensation, as distinguished from wages or rent, for the assumption of risk. These include both independent nonprofit schools and those affiliated with a religious organization.

- Private For-Profit (profitmaking)—A private institution in which the individual(s) or agency in control receives compensation other than wages or rent for the assumption of risk.

Level of Offering

Highest level of offering includes the following categories:

- Postsecondary Award, Certificate, or Diploma (less than 1 academic year). An award that normally requires completion of an organized program of study at the postsecondary level in less than 1 full-time-equivalent academic year (2 semesters or 3 quarters), or in less than 900 contact hours by a student enrolled full time.

- Postsecondary Award, Certificate, or Diploma (at least 1 but less than 2 academic years). An award that normally requires completion of an organized program of study at the postsecondary level in at least 1 but less than 2 full-time-equivalent academic years, or is designed for completion in at least 30 but less than 60 credit hours, or in at least 900 but less than 1,800 contact hours.

- Associate's Degree. An award that normally requires at least 2 but less than 4 years of full-time-equivalent college-level work.
- Postsecondary Award, Certificate, or Diploma (at least 2 but less than 4 academic years). An award (other than an associate's degree) that normally requires completion of an organized program of study at the postsecondary level in at least 2 but less than 4 full-time-equivalent academic years, or is designed for completion in at least 60 but less than 120 credit hours, or in at least 1,800 but less than 3,600 contact hours.
- Bachelor's Degree. An award that normally requires at least 4 but not more than 5 years of full-time-equivalent college-level work. This includes all bachelor's degrees conferred in a 5-year cooperative or work-study plan or program. A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with college studies. Also included are bachelor's degrees for which the normal 4 years of work are completed in 3 years.
- Postbaccalaureate Certificate. An award that requires completion of an organized program of study of 18 credit hours beyond the bachelor's degree, designed for persons who have completed a baccalaureate degree but do not meet the requirements for an academic master's degree.
- Master's Degree. An award that requires the successful completion of a program of study of at least 1 but not more than 2 full-time equivalent academic years of college work beyond the bachelor's degree.
- Post-Master's Certificate. An award that requires completion of an organized program of study of 24 credit hours beyond the master's degree, but does not meet the requirements of academic degrees at the doctor's degree level.
- Doctor's Degree. An award that requires work at the graduate level and terminates in a doctor's degree. Includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Doctor of Philosophy degree in any field such as agronomy, economics, chemistry, or engineering.
- First-Professional Degree. An award that requires completion of a program that meets all of the following criteria: (1) requires at least 2 years of college work before entering the program; (2) requires completion of the academic requirements to begin practice in the profession; and (3) requires a total of at least 6 academic years of college-level work to complete the degree.

  First-professional degrees may be awarded in the following fields:

  Chiropractic (D.C. or D.C.M.)
  Dentistry (D.D.S. or D.M.D.)
  Law (L.L.B., J.D.)
  Medicine (M.D.)
  Optometry (O.D.)
  Osteopathic Medicine (D.O.)
  Pharmacy (D.Phar.)
  Podiatry (Pod.D. or D.P.)
  Theology (M.Div. or M.H.L. or B.D.)
  Veterinary Medicine (D.V.M.)

- First-Professional Certificate (post-degree). An award that requires completion of an organized program of study designed for persons who have obtained the first-professional degree. Examples could be refresher courses, or additional units of study in a specialty or subspecialty.

Identification Codes

The *Directory* includes two identification codes used throughout the text:

- UNITID. This unique 6-digit identification code is assigned by the National Center for Education Statistics to each unit, or postsecondary institution, included in IPEDS; it will not change from year-to-year. The UNITID is used to link all IPEDS databases including

Institutional Characteristics, Fall Enrollment, Completions, Finance, Salaries, etc.

- FICE. This identifier was created by the Federal Interagency Committee on Education. The 6-digit code is included in the *Directory* to identify those institutions accredited at the college level by an agency recognized by the Secretary, U.S. Department of Education. Institutions carrying a FICE code were formerly included in the Higher Education General Information Survey (HEGIS) system, or are newly accredited institutions of higher education. IPEDS uses FICE to maintain the identification of this subset of accredited schools; however, since IPEDS separately identifies all institutions and branches that offer complete programs of study, a school may have several entries now, where only one existed under HEGIS. In order to identify the branches of HEGIS schools that are now separate reporting units, NCES has developed a "dummy" FICE code. For example, assume that "ABC College" (FICE code = 005555) was considered one school with all campuses reporting together in HEGIS. The IPEDS system, however, considers it to be three separate schools, each with its own UNITID code:

UNITID	Institution Name	FICE
123444	ABC College - Main Campus	005555
123555	ABC College - West Campus	905555
123666	ABC College - Another City	905555

The assignment of these "dummy" FICE codes (i.e., with a "9" in the first position) allows readers and analysts to identify all parts of the universe of accredited institutions.

In addition to displaying the FICE code in the institutional listings, these schools have an (H) preceding the school name for easy identification.

Enrollment

The fall 1988 total enrollment is given for each institution. Undergraduate, graduate, and first-professional students, both full- and part-time, are included. Also included are students taking courses that are part of a vocational or occupational program. Excluded are students in noncredit adult education courses; students taking courses at home by correspondence, radio, or television where the courses are not creditable toward a degree or other formal award; students enrolled only for "short courses;" auditors; students studying abroad; and students enrolled at a branch campus or extension center in a foreign country.

For institutions included in the 1988 IPEDS "Fall Enrollment" survey database, actual responses (R) or imputed data (I) are provided. The total student headcount is followed by the percent of students who are female. Since the private less-than-2-year schools were surveyed for fall enrollment on a sample basis, these schools list the enrollment count provided on the 1989-90 "Institutional Characteristics" survey form.

Tuition

Institutions were asked to report the typical tuition and fees required of full-time students for the entire 1989-90 academic year. Required fees are defined as charges to students for items not covered by tuition, but required of such a large proportion of all students that the student who does not pay the charge is an exception.

- For each institutional listing, tuition at public 4- and 2-year schools is indicated as "in-State" or "in-district" when there is a difference in charges based on residency requirements. For private schools, all tuitions are "in-State."

- Separate charges are shown for graduate programs, where applicable.

- In private less-than-2-year schools, the tuition and required fees are given for the program with the largest enrollment at that school.

Room and Board Charges

Institutions were asked to report room and board charges for the entire academic year. Room charges were to reflect what a student would expect to pay if sharing a room with one other student. Institutional listings indicate the yearly charge for a meal plan and, in parentheses, the number of meals provided per week.

In some instances, institutions charge one fee for both room and board. For these schools, the combined amount is listed under the room charge; the board charge is shown as "$$," followed by the number of meals provided.

Accreditation

Accreditation, as indicated in this directory, is self-reported by the institutions; no attempt has been made to verify these with the various regional or professional accrediting bodies. This verification process will be conducted during the fall of 1990. The professional accrediting agencies shown in the institutional listings are those recognized by the Secretary, U.S. Department of Education. A complete list of these associations and their accreditation acronyms (as used in the institutional listings) can be found in appendix C.

Survey Methodology

The "Institutional Characteristics" (IC) survey was mailed to 11,687 institutions in July 1989. IC1 forms were sent to 140 corporate or system offices that administered two or more postsecondary institutions, plus 2,649 institutions that offered a 4-year award or higher; 3,190 received an IC2 form (public schools offering awards for programs of less-than-4-years duration, and private schools with programs of at least 2-but-less-than-4-years duration); and IC3 forms were mailed to 5,708 private schools offering awards for programs of less-than- 2-years duration. Also, between August 1989 and January 1990, approximately 300 IC forms were mailed to schools and/or branches that were identified as possible additions to the IPEDS universe. However, new schools were added to the universe only if a completed "Institutional Characteristics" survey form was received and it was determined that the school offered postsecondary education programs.

The IC survey forms were designed to shuttle back to the institutions data that were provided in a prior year; thus, an institution need only update the questionnaires with current or changed information such as tuition and fees.

Survey responses were edited for internal consistency. For example, if graduate programs were offered, was graduate tuition reported? Also, responses were checked for consistency with the previous year's response.

Extensive followup for nonresponse was conducted between October 1, 1989 and February 20, 1990. Institutions were called and key data elements were collected using a CATI (Computer Assisted Telephone Interview) system. Data were then uploaded to the database and were processed and edited.

During the processing cycle, IPEDS coordinators in the States and NCES staff made a considerable effort to "clean up" the universe. Many entities were identified as "out-of-scope" including: schools that were duplicated on the file; those that had closed or no longer offered postsecondary programs; listings that did not conform to the IPEDS definition of a branch, but were really extension centers that are *not* to report separately; and schools that were primarily secondary or avocational, and thus, should not report under IPEDS. The final listing also reflects mergers of existing institutions and new schools that have been added to the universe.

This final universe consisted of 10,919 entities: 143 central/system offices; 2,603 4-year and above institutions; 2,818 2-year schools; and 5,355 schools with less than 2-year programs. A total of 963 schools were deleted, while 195 new schools completed IC forms and were added to the universe. Note that, for the most part, the tables included in the *Directory* are limited to the 10,606 institutions in the 50 States and the District of Columbia.

[2] Net added identifies the total number of schools added to IPEDS during the 1989-90 processing year; however, the table does not account for shifting of schools between levels of offering. These shifts are hidden in the first column of the table.

Pub=Public N-P=Nonprofit F-P=For-Profit

The overall response rate to the "Institutional Characteristics" survey (82 percent) was calculated as the ratio of the number of completed questionnaires divided by the number of schools in the final universe; that is, the number mailed minus the number deleted (out-of-scope) plus the new schools that submitted IC forms.

There has been no attempt to impute data requested on the "Institutional Characteristics" survey form; however, tuition charges provided for a quarter or semester were converted to academic year charges to conform to completion instructions.

Symbols Used in the Directory

* Indicates that data were not reported by the institution.

(H) Indicates that the institution is accredited at the college level by an agency recognized by the Secretary, U.S. Department of Education. (See list of approved agencies in Appendix C.)

$$ This symbol indicates that the room and board charges are combined. The total amount is listed under room; $$ is shown under board, followed by the number of meals provided per week.

(R) With enrollment, indicates that the headcount provided is the actual amount reported by the institution.

(I) With enrollment, indicates that the institution did not respond to the 1988 "Fall Enrollment" survey; thus 1988 enrollment data have been imputed.

(F) With enrollment, indicates the percent of the student body that is female.
